§

implementing the chart with

bit.ly/canvas_spring

```
export default function App() {

  const { x } = useSpring({
    from: { x: FROM_X },
    to: async (next) => {
      while (1) {
        await next({ x: TO_X });
        await next({ x: FROM_X });
      }
    }
  });

  return (
    <div className="App">
      <animated.div>{x}</animated.div>

    </div>
  );
}
```

100.02

100.02

```
export default function App() {

  const { x } = useSpring({
    from: { x: FROM_X },
    to: async (next) => {
      while (1) {
        await next({ x: TO_X });
        await next({ x: FROM_X });
      }
    }
  });

  return (
    <div className="App">
      <animated.div>{x}</animated.div>

    </div>
  );
}
```
