```
import { useSprings, animated, config } from "react-spring";
```

```
const radiusSprings = useSprings(  
  data.length,  
  data.map((dataPoint, index) => ({  
    radius: radiusScale(dataPoint.count),  
    config: config.molasses,  
  })))  
);
```

```
{data.map((dataPoint, index) => (  
  <circle  
    cx={xScale(index)}  
    r={radiusScale(dataPoint.value)}  
    // ...  
  >  
))}
```

```
{data.map((dataPoint, index) => (  
  <animated.circle  
    cx={xScale(index)}  
    r={springs[index].radius}  
    // ...  
  />  
))}
```
